

# SA160 STRIKER

# Country's Striker: The World's Cleanest Wood Burning Stove

## STRIKER S160 - LOWEST EMISSIONS NON-CATALYTIC STOVE MADE

Small

"The house is finally warm. It is so relaxing to simply sit and watch the fire"

- Michel, L., PA

\*EPA rating, non-catalytic since September 1995.

Striker SA160 shown in metallic black with optional 24K gold plated arched door and Olympic cast black legs.

**According to the US Environmental Protection Agency, the Striker S160 Series is the lowest emissions non-catalytic stove made anywhere in the world.**

Coupled with its strong appeal as a hearth showpiece is the most efficient combustion system ever made in a wood stove. The handcrafted Striker performs at an amazing 1.6 grams per hour average and at 1 gram per hour where you'll use it most, the low burn setting, allowing you to achieve the long clean burns Country Stoves is famous for.

Striker 160 shown in metallic black on pedestal with optional 24K gold plated door and custom gold deco trim paint.

### S160 Features:

- ▲ All critical parts inside the firebox made of stainless steel for long service life
- ▲ Large door providing unobstructed view of fire
- ▲ Singular draft control technology offers ease of operation
- ▲ Mobile home approved for freestanding applications, pedestal or leg mounted
- ▲ See option pages 12 and 13 for a wide variety of options allowing you to add distinction and a personal touch to your handcrafted Country Stove
